## EXPERIENCE

### MOBILE APPLICATION DEVELOPER

Flutter

1. Designing , Developing , Implementation (Android).
2. Responsive UI development by Flutter ,API Service integration ,Firebase ,Multi-Languages ,PDF viewer ,Google ,Latex , map api with live location updates ,Camera , Http ,Authentication
3. Managing large projects or multiple components with smooth implementation and state management

### FULL STACK DEVELOPER

NODE JS/Flask

1. Experience with MongoDB database , Express , Restful API

REACT JS

1. Designing and Developing Content Management System (CMS) Basics

### PROGRAMMING

Problem solving

1. [HackerRank/github.com](https://leetcode.com/)
2. [Codeforces/github.com](https://codeforces.com/)

## EDUCATION

2015 – 2020

### INFORMATION TECHNOLOGY ENGINEERING BACHELOR

[Damascus University](#) . [Specialized In Artificial Intelligence](#) . [71 GPA](#)

## SKILLS

- Languages: Python, JavaScript, Dart.
- Frameworks & Libraries: Flutter, Flask, Express.JS, Node.JS, P5.JS, REACT.JS.
- Frontend Basics & styles: Html, CSS, Bootstrap, JQuery, EJS, JS DOM, Material UI, Ant Design
- Database Systems: MongoDB basics.
- Backend Service: Firebase basics.
- Artificial Intelligence Techniques: Natural Language Processing & Expert System.
- Quick learner.
- Problem solving.
- Writing and conversation skills in English.
- Time management and Teamwork skills.

## WORK APPLICATIONS

[GrammerSolverApp/github.com](#) : Flutter app with smooth UI and state management and using http requests and camera native device with Falsk APIs and natural language processing (NLP) and regular expression (RE) basics to solve different kind of english grammar exercises

[ChatApp/github.com](#) : Flutter app using state management and firebase as database to store chat data and firebase authentication (login-register)

[ShopApp/github.com](#) : Flutter app with smooth UI and state management to show shop products and order a shop cart with many product of your choose
